Education

Technical University of Munich **Munich, BY**
Master of Science, Informatics / Computer Science Oct 2025 – Present

- Specialization in Software Engineering, Cybersecurity and Machine Learning and AI
- Relevant Coursework: Deep Learning, Webapplication Security, DevOps, Cryptography, Embedded / Network Security, Advanced Algorithms

Technical University of Munich **Munich, BY**
Bachelor of Science, Informatics / Computer Science Oct 2022 – Sep 2025

- Minor in Management and Economics
- Relevant Coursework: Software Engineering, Functional Programming, Data Structures and Algorithms, Computer Networks, Operating Systems

Experience

Cybersecurity Strategy **Jun 2026 – Present**
Deloitte / Technology, Working Student *Munich, BY*

- Development of an AI native CMMI assessment tool with RAG, turn based interaction and SSO integration
- Assistance in Cybersecurity Assessment (IAM, DS, PII) of major clients

Working Student **Jun 2025 – May 2026**
Siemens AG *Munich, BY*

FT - R&D Software Engineering (Feb 2026 – May 2026)

- Self localisation of edge devices using Mesh-Networks on mqtt
- Integration with autonomously guided vehicles

CYS-OE-IS - IT-Infrastructure and Administration (Jun 2025 – Feb 2026)

- Deployment and configuration of IT infrastructure for Siemens Cybersecurity (Proxmox)
- Automation of intra service synchronization

Software Engineering Intern **Oct 2024 – Feb 2025**
TUM / iPraktikum / Siemens, Practical Course *Garching, BY*

- Developed the iOS application ”Safeguard” that tackles EHS challenges

Projects

Neurobridge
React, Supabase, Healthcare

- A two sided integrated platform for tetraplegic that got a BCI implant, used in real clinical setting
- Communication and tracking for patients and caretakers, including a patient portal and a caretaker dashboard and possible training of BCI chip on the smartphone app

CareDesk
FastAPI, Langchain, CI/CD, Terraform, K8s

- Microservice based clinical organization tool, including appointment booking, patient data and GenAI
- Langchain integration with FastAPI microservice and vector database for scalable and personalized queries

Siemens Safeguard
Swift, SwiftUI, K8s

- Realtime iOS app that utilizes device proxmity and personalized settings for in factory warning of EHS specified hazards

Skills

Programming Languages: Java, Python, C/C#, SQL, JS/TS, HTML/CSS, PHP, Dart, Swift, OCaml, Rust
Developer Tools: Git, Docker, Ansible, Terraform, Kubernetes, Slack, Mira, Draw.io, IntelliJ
Peronal Interests: Raspberry Pi, Selfhosting, Embedded Systems, Robotics, Aerospace, Neuroscience
Languages: German (native), English (fluent), Chinese (basic)
